

Executive Shield

Holistic risk assessment, monitoring, plus PII identification and removal

Executive Shield provides comprehensive risk assessments, PII reduction, and ongoing monitoring of an individual's digital risk profile. An analyst-led service, Executive Shield detects exposures, avoids doxxing, stops fraud, and reduces security risks to high-visibility people.

Exposure Monitoring

PII Removal

Revealing Targetable Weaknesses

Protect key team members from unnecessary harm by reducing exposure, identifying vulnerabilities, and monitoring for threats targeting your people on social media, extremist forums, and the dark web. Executive Shield finds and removes sensitive information that may lead to reputational damage, increased cyber attacks, or physical harm to your people.

“Nisos’ uniquely qualified team excels at building insight across the risk spectrum, working hand-in-hand with businesses to apply insights to drive effective mitigation.”

John Moore
Global Risk Management Professional

Finished Intelligence and Ongoing Monitoring

Executive Shield delivers credible, reliable intelligence gathered through regular OSINT monitoring and expert tradecraft. Every Executive Shield engagement starts with an annual risk assessment, including sentiment analysis, and provides clear recommendations to improve protection. Nisos focuses intently on threat actor activities that target your people, including threats to individuals and locations, illegitimate registration of social media accounts and domain names, and exposed account credentials.

Personally Identifiable Information (PII) Removal

Executive Shield removes PII from publicly available databases and brokers where possible. We also document any data that requires individuals to remove it themselves. Ongoing PII reduction is tracked and documented throughout your engagement for an up-to-date view of exposure.

About Nisos®

Nisos is the Managed Intelligence Company. We are a trusted digital investigations partner specializing in unmasking threats to protect people, organizations, and their digital ecosystems in the commercial and public sectors. Our open source intelligence services help security, intelligence, legal, and trust and safety teams make critical decisions, impose real-world consequences, and increase adversary costs.
