Executive Summary

The Japanese government warned domestic companies in March 2024 about contracting North Korean (DPRK) IT workers posing as Japanese nationals to earn cash, as it is suspected they are using the proceeds to fund Pyongyang's ballistic missile and nuclear weapons development programs.¹ The United States, Japan, and the Republic of Korea jointly issued an updated warning on 14 January 2025 advising private sector entities, particularly in blockchain and freelance work industries, to thoroughly review risk advisories and announcements to better inform cyber threat mitigation measures and to mitigate the risk of inadvertently hiring DPRK IT workers.² Many smaller companies however do not have adequate resources to perform these checks themselves.

In this report, Nisos identified a likely DPRK IT worker, who appears to have been employed in remote Software Engineering and Full Stack Developer positions with Japanese companies since January 2023. The individual appears to be currently employed under the name Weitao Wang at Japanese consulting company, Tenpct Inc., and appears to have been previously employed under the name Osamu Odaka at Japanese software development and consulting firm, LinkX Inc. Nisos researchers identified the individual and his two fake personas based on an email address the United Nations Security Council shared in March 2024, and we were able to identify resumes, GitHub accounts, and work history via open source research techniques. Nisos leverages cross-platform visibility and analytical expertise to provide comprehensive reporting on cyber threats and threat actors that target companies for nefarious reasons.

The United Nations Security Council Report

In March 2024, the United Nations Security Council circulated a panel of experts report which highlighted that DPRK nationals working overseas earn income in violation of sanctions, including in the information technology, restaurant, and construction sectors.³ In the report, the panel highlighted a list of email addresses that were reportedly associated with DPRK IT workers. One of the email addresses provided was anacondaDev0120@gmail[.]com.

AnacondaDev0120

GitHub Account AnacondaDev0120

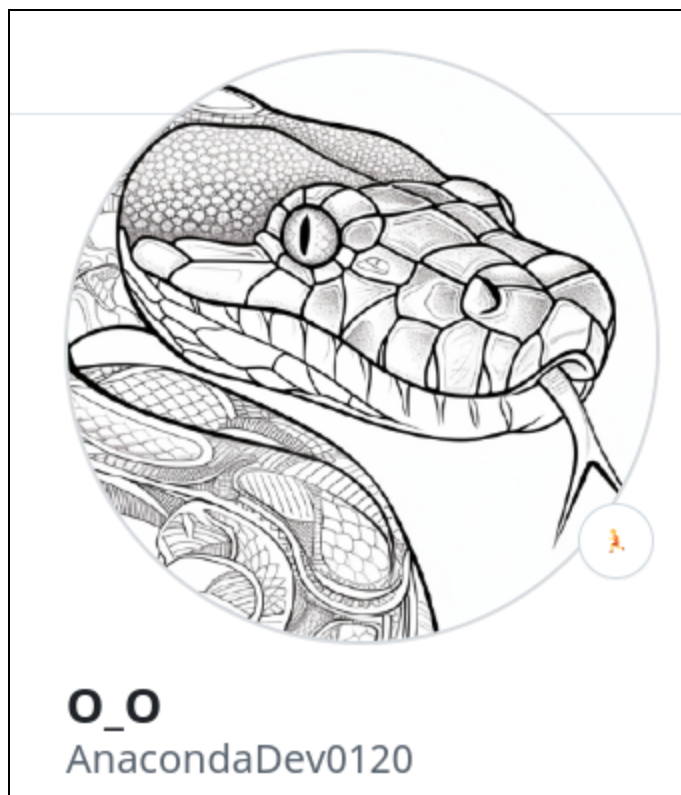

Nisos researches identified a Github account associated with the email address anacondadev0120@gmail[.]com, which used the username O_O—likely the initials for the likely DPRK IT worker persona Osamu Odaka—and screenname AnacondaDev0120. Researchers found a commit on

the page in March 2024 that was co-authored by github user nickdev0118, which was associated with the email address nickdev0118@gmail[.]com. Research revealed that the email address nickdev0118@gmail[.]com was listed as a contact method for possibly Vietnam-based Huy Diep, who appears to also be employed at Japanese consulting company 10pct. Inc (cf. page 13).

Freelancer Employment Websites Linked To Anacondadev0120

Nisos researchers identified three freelance employment websites, which listed the Github username anacondadev0120. Two of the websites, LaborX and ProPursuit, had active accounts, while the account on Remote Ok was removed from the website. Each of the freelancer websites' information was linked to a different name and to different contact information, while claiming the same anacondadev0120 Github account.

LaborX

The resume on freelancer website LaborX listed the name Osamu Odaka while claiming the Github account anacondadev0120. The resume revealed a digitally manipulated photo on the website and an inactive linkedin account.

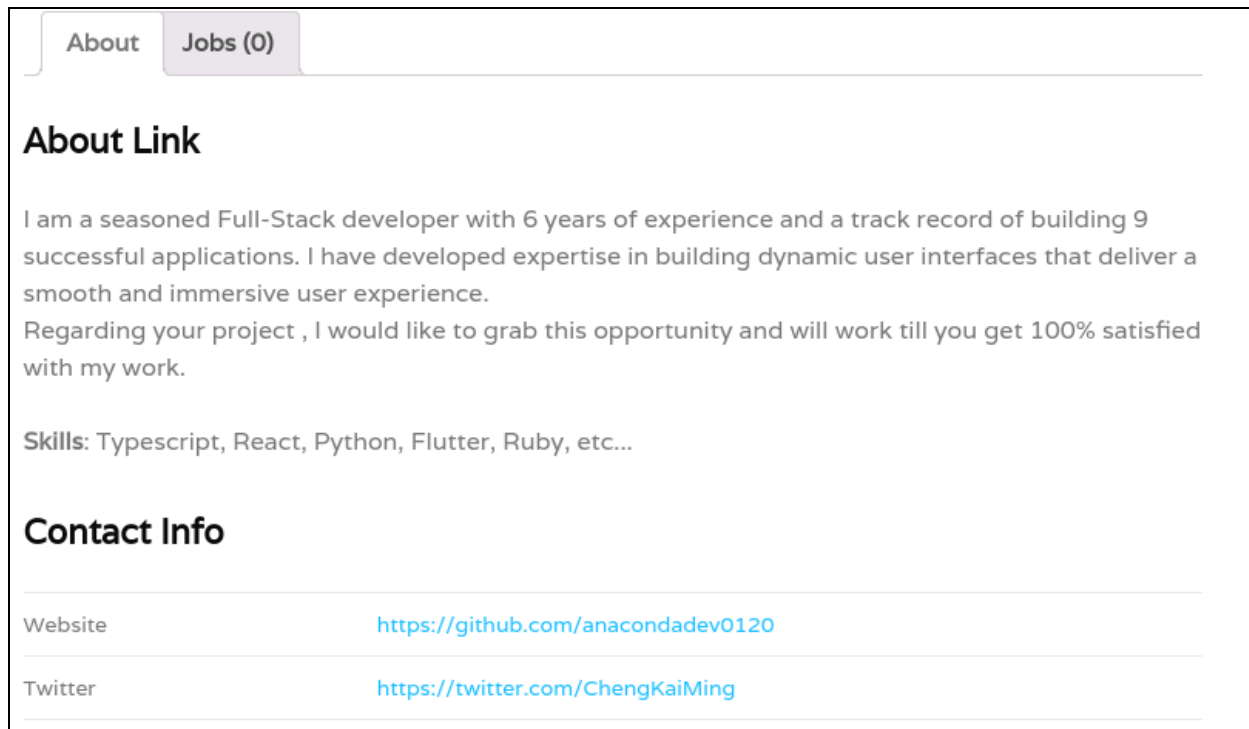

Graphics 3-4: Profile picture and contact information for the Labor X account.⁶

ProPursuit

The resume on freelancer website ProPursuit listed the name “Link,” while claiming the Github account anacondadev0120. The resume linked to an X account with the username cheng kai ming, which remains active, but has not been updated since 20 October 2012.

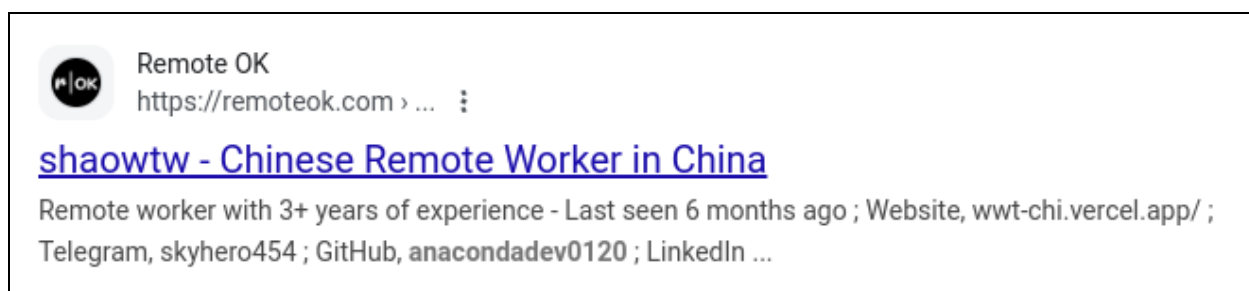

⁶[https://laborx\[.\]com/freelancers/users/id241156](https://laborx[.]com/freelancers/users/id241156)

Graphic 5: Account details for the Pro Pursuit account.⁷

Remote Ok

The resume on freelancer website Remote Ok listed the name “shaowtw,” while claiming the Github account anacondadev0120. The resume contained a link to wwt-chi.vercel[.]app, which was no longer active and provided Telegram username skyhero454.

Graphic 6: Google search result for Remote Ok.

Fake Persona 1: WeiTao Wang

Nisos researchers identified the persona WeiTao Wang—used by the likely DPRK IT worker to obtain remote work in Japan—by investigating the Telegram username skyhero454, which was also listed in the freelancer website Remote Ok above. The persona lists the same Telegram username on a website

⁷[https://propursuit\[.\]io/companies/link-opd5axmzw-singapore](https://propursuit[.]io/companies/link-opd5axmzw-singapore)

designed to obtain employment. Nisos researchers identified TTPs on the website that are commonly associated with DPRK IT workers, which we enumerated in the subsections below. The website also revealed that the individual appears to have been employed at LinkX Inc., a Japanese software development and consulting firm, between 2022 and 2023.

Digital Photo Manipulation

The website for WeiTao Wang contains a photograph of the likely DPRK IT worker, which was digitally manipulated. Nisos researchers found that the head of the individual was pasted onto a stock photo of a man in a white shirt wearing a dark-colored blazer. Additionally, a photo on the website of the same individual working with a colleague was also digitally manipulated. The individual also pasted his head onto a stock photo. Researchers identified several additional indications that the second photograph was also digitally manipulated.

Graphic 7: Profile Photo from WeiTao Wang’s website.

Graphic 8: Stock Photo of the outfit in Graphic 7.

Graphic 9: Digitally enhanced photo from WeiTao Wang’s Website.

Graphic 10: Stock Photo used in Graphic 9.

Significant Development Experience

DPRK IT worker personas frequently claim to have experience developing web and mobile applications, knowledge of multiple programming languages, and an understanding of blockchain technology. On the persona’s website, WeiTao Wang lists “extensive development experience with HTML, JavaScript, React, Python, Vue.js, Ruby on Rails, TypeScript, Node.js, PHP, Smart Contracts & Web3 and more” and claims to have worked as a Blockchain developer from 2019 to 2022.

My Services

 <p>Small ios & android App</p>	 <p>Creative Website Design</p>

Graphic 11: Skills sets the persona advertised on his website.⁸

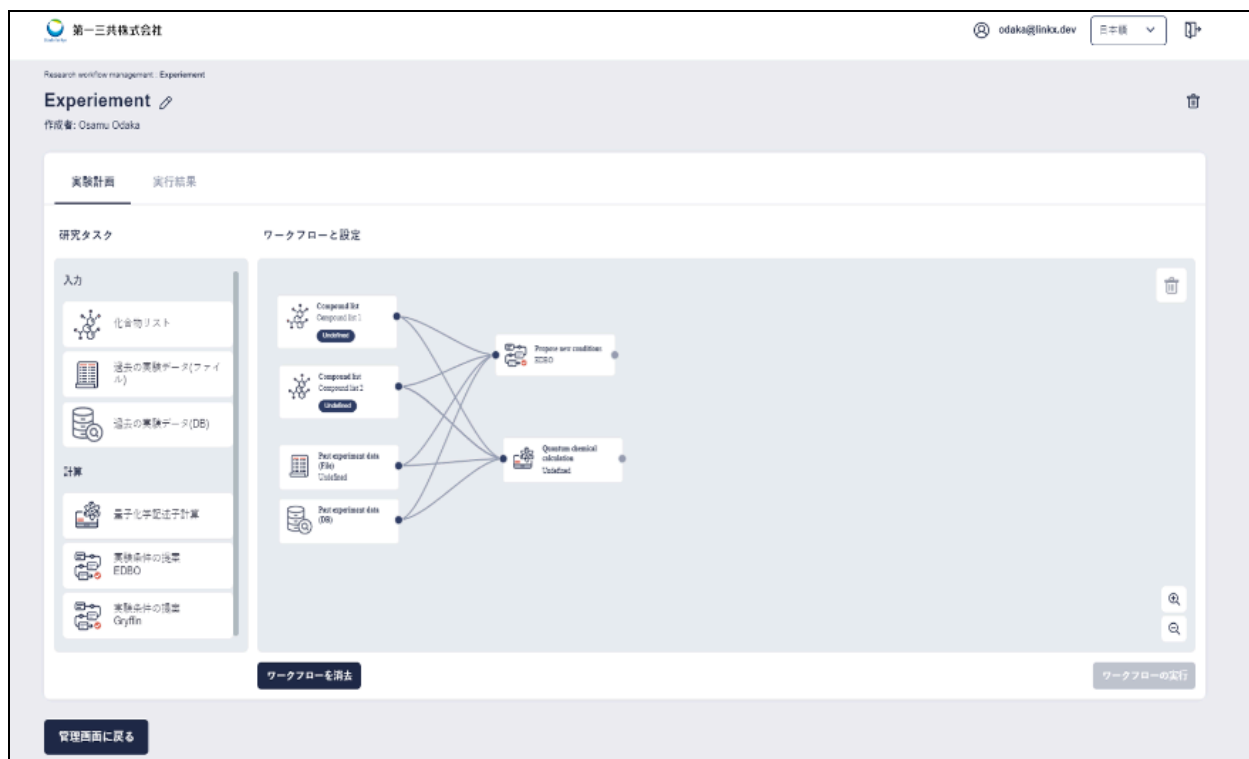

Shared Resume Content

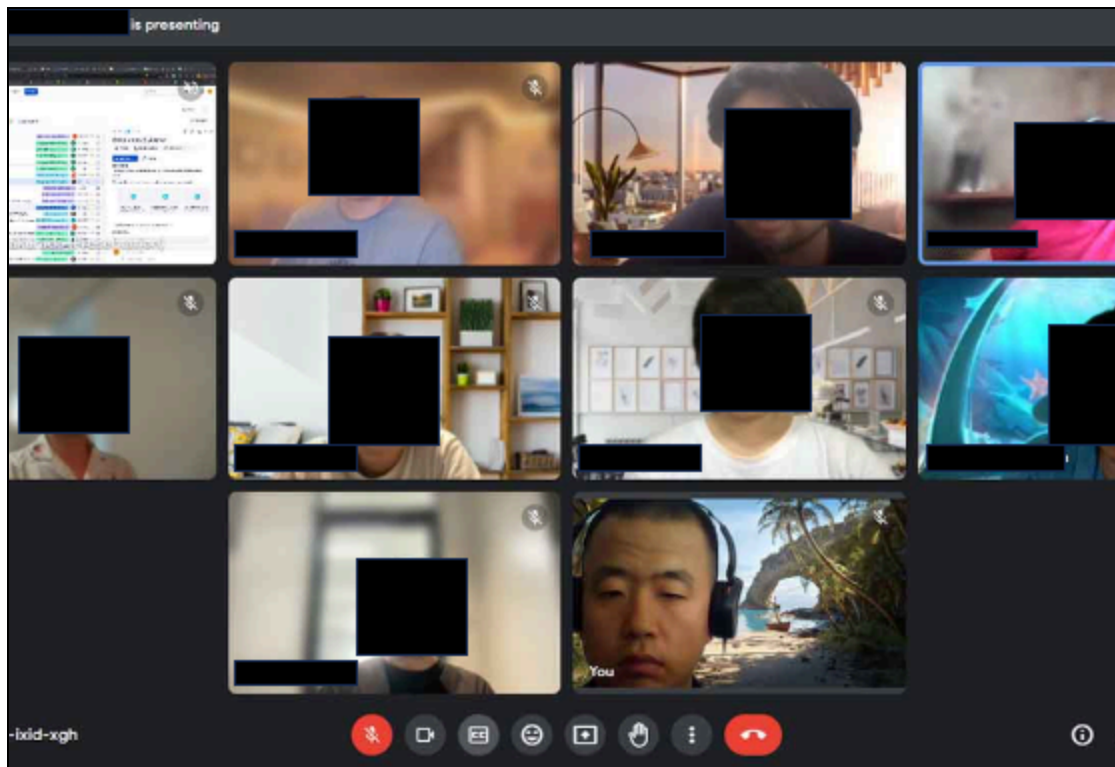

DPRK IT workers often reuse resume content borrowed from other personas to enhance their resumes. The WeiTao Wang persona borrowed three pieces of content from the Osamu Odaka persona.

- On the persona’s website, WeiTao Wang shared a photo of a project from the Osamu Odaka persona which that persona completed while working for LinkX Inc.

⁸[https://wwt-nu.vercel\[.\]app](https://wwt-nu.vercel[.]app)

- Additionally, the WeiTao Wang persona website contains a photo of a Google Meet meeting, in which the likely DPRK IT worker is participating alongside several current LinkX Inc. employees, further suggesting that the individual worked at the company as Osamu Odaka.
- Lastly, WeiTao Wang listed the same work experience as Osamu Odaka on their resumes, including work for LinkX Inc., freelance work, and a position at NewIT Inc. in Vietnam.

Graphics 12-13: Work examples on WeiTao Wang persona website showcasing from Osamu Odaka persona.⁹

Front-end & Back-end Web Engineer, Linkx .Inc
Tokyo Minatoku, JP
April 2022 – June 2023

- Worked as a full-stack web developer on both of front & back end part.
- Solved 4x speed up fetching data from DB.
- Satisfied customers requirements by perfect result and 100% of code test.
- Participated building large scale chemistry experiment web service involving Rest API.

Blockchain & Full-stack Engineer
Freelancer.
April 2019 – March 2022

- Participated building websites of NFT, Dapp, Defi.
- Completed and launched Token presale site for 4M tokens, NFTGM-DAO (Olympus DAO).
- Modified and updated dozens of websites require various skills on front & back-ends.
- Built dozens of Python and Ruby projects.

Web Back-end Developer
NewIT .Inc HK.
May 2015–July 2017

- Built PHP back-end engine of websites for customers of company.
- Designed DB for various web projects.

Username Shaowtw

Nisos researchers uncovered the username shaowtw on the freelancer website Remote Ok where it was associated with Github account anacondadev0120. Additionally the WeiTao Wang persona lists

⁹[https://wwt-nu.vercel\[.\]app](https://wwt-nu.vercel[.]app)

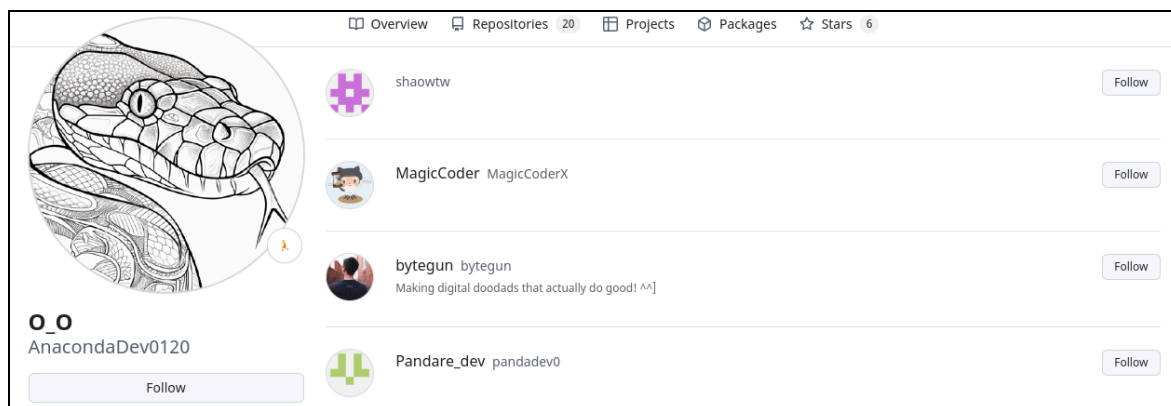

¹⁰[https://wwt-nu.vercel\[.\]app](https://wwt-nu.vercel[.]app)

shaowtw@gmail[.]com as a contact email. Researchers also found a Github account as well as a LinkedIn account with the same username, which suggest that this account is also connected to the likely DPRK IT worker.

GitHub

Researchers found that Github account AnacondaDev0120 was following the GitHub account shaowtw. The Github only has one follower and is only following one other account, however, it had over one thousand contributions in 2024. A review of the contributions showed that the account was associated with the email address shaowtw@gmail[.]com, which was also listed on the resume for the WeiTao Wang persona.

Graphic 18: 3 May 2024 commit on shaowtw’s Github account.¹⁴

Other Employment Website

Using the username shaowtw, researchers identified a current resume for the WeiTao Wang persona, which listed the possible DPRK IT worker’s LinkX Inc. in the work experience section and suggests that the persona is currently employed at Japanese consulting company Tenpct Inc. A review of the Tenpct Inc. website shows the WeiTao Wang persona as an employee and also lists Huy Diep as an employee.

Graphic 20: Partial Employee list for Tenpct Inc., showing WeiTao Wang and Huy Diep as employees.¹⁵

Fake Persona 2: Osamu Odaka

Nisos researcher identified the persona Osamu Odaka—used by the likely DPRK IT worker to obtain remote work in Japan—based on the persona listing Github username anacondadev0120 on their resume. Researchers assess that this persona was used prior to the WeiTao Wang persona, as the website is less sophisticated and the DPRK IT worker appears to have gained employment at LinkX Inc using this persona. Nonetheless, researchers identified the following TTPs on the website, which are commonly associated with DPRK IT workers and mirror those identified above.

Digital Photo Manipulation

The website for Osamu Odaka contains a photograph of the individual that was digitally manipulated. Nisos researchers found that the head of the individual was pasted onto a stock photo of a man in a blue shirt with a brown belt.

¹⁵[https://www.tenpct\[.\]jp/member](https://www.tenpct[.]jp/member)

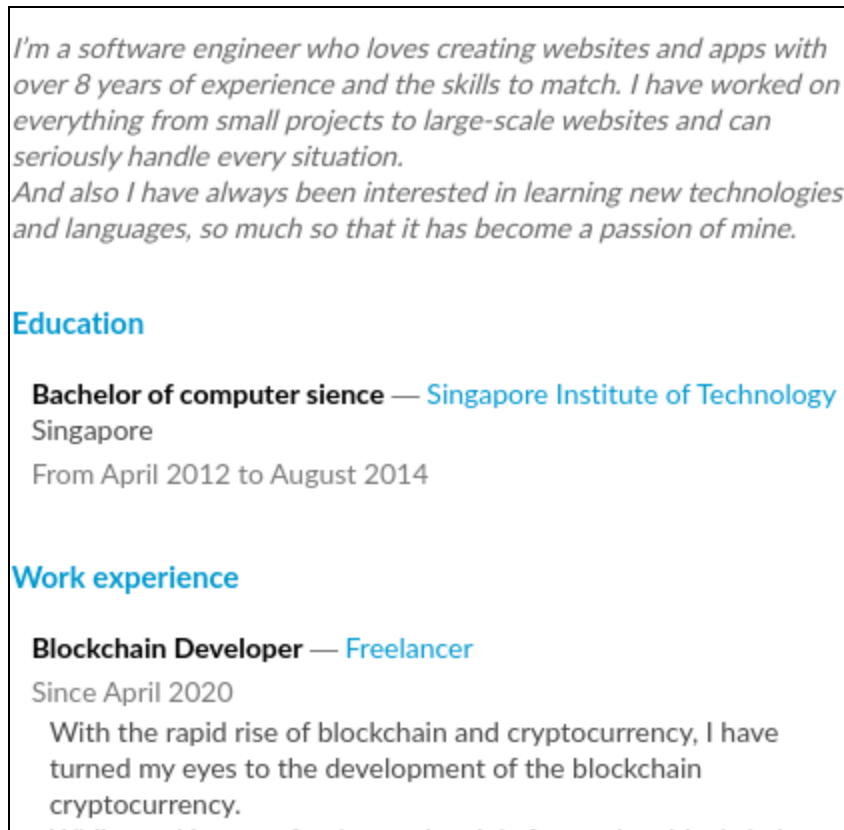

Graphic 21: Profile Photo from Osamu Odaka's website.

Graphic 22: Stock Photo of the outfit used in Graphic 21.

Significant Development Experience

DPRK IT worker personas claim to have experience developing web and mobile applications, knowledge of multiple programming languages, and an understanding of blockchain technology. Osamu Odaka on the persona's resume claims to have experience in creating websites and apps. He also says he worked on the development of blockchain cryptocurrency.

Graphic 23: Osamu Odaka's resume content.¹⁶

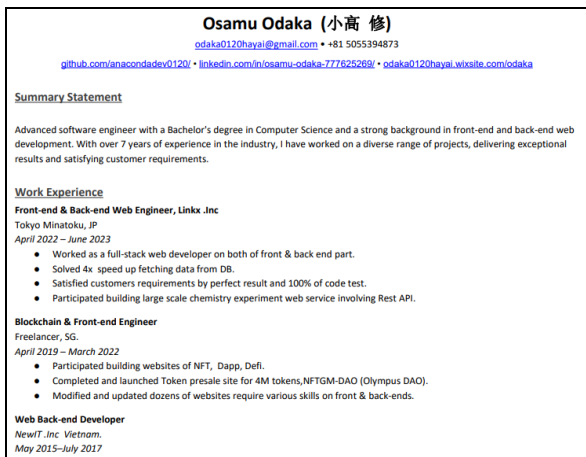

Freelancer Websites

Nisos researchers identified three freelance employment websites, which were set up with the name Osamu Odaka. Freelance website LaborX, discussed above, contained more updated work history than the website for the persona and a different photograph, but otherwise contained the same contact information. The other websites, Working Not Working and Remote Hub, did not have active accounts.

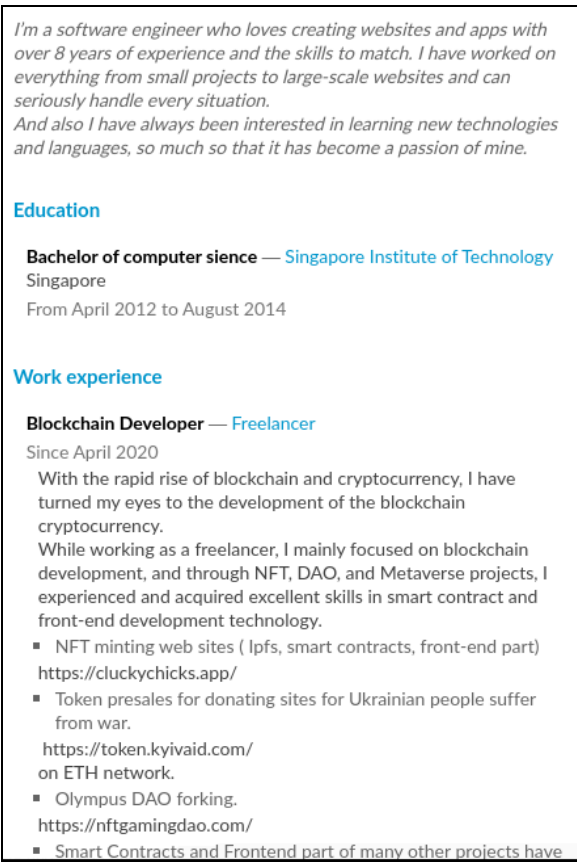

LaborX

The resume on freelancer website LaborX listed the name Osamu Odaka, while claiming the Github account anacondadev0120. The resume on this website includes the work for LinkX Inc. as a web engineer.

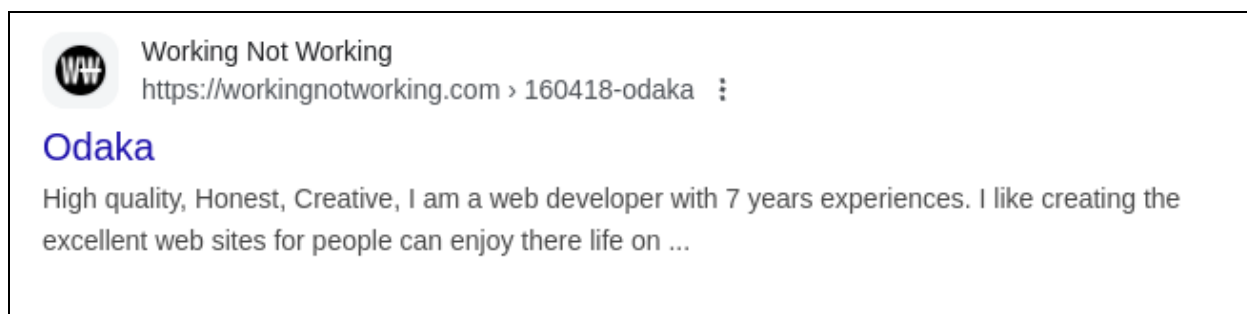

Graphic 24: Resume from the LaborX website.

Graphic 25: Resume from the CV Designr website.¹⁷

Working Not Working

The resume on freelancer website Working Not Working shows that the persona has 7 years of web development experience. The account, however, has been removed, so no additional information is available on the account holder. Historical information shows that the persona claimed to have skills in backend development, blockchain, and scripting languages.

Graphics 26-27: Skills listed on Working Not Working’s website.¹⁸

Remote Hub

The resume on freelancer website Remote Hub shows that the persona has experience in blockchain (NFT mint & marketplace). The account has been removed, however, historical data shows that the account was set up on 25 February 2022 and contained a link to the Osamu Odaka persona website.
